

NET Electric

The soberly elegant design of the elements and the painstaking attention to detail can also be seen in the 4 invisible well attachments.

The exclusivity of this electric designer radiator comes from the innovative electronics incorporated completely into its design.

Model	Depth P mm	Height H mm	Width mm	Weight Kg	Thermal Power Watt
870 H 870	62	870	500	12,8	500
1270 H 1270	62	1270	500	18,3	750
1830 H 1830	62	1830	500	26,5	1000

Electronic control system: wireless communication by means of radio signals transmitted to the receiver connected to the system; radius of action about 30-50 metres in residential environments (433 MHz); radio frequency communication complying with European regulations; optional ITCS FUNCTION (Intelligent Temperature Control System), for intelligent temperature control. This technology allows the exact desired temperature at the set time.

NET Electric is a towel-warmer with a decisive and precise outline and a shape that can be inserted in the limited space available in the bathroom for added personality. Perfectly integrated invisible electronic control ensures elevated heating power (up to 1000 Watt) for the satisfaction of every need. The radiator comes standard-equipped with a programmable wireless radio frequency chrono-thermostat.
